

Contents

CHAPTER 1: SKIN REJUVENATION

What Is the Goal?	2
What Are the Features of Healthy Skin?	2
What Are the Benefits of Healthy Skin?	3
What Are the Clinical Benefits of Healthy Skin?	3
What Can We Do to Optimize Skin Health?	3
What Are the Key Goals of Skin Rejuvenation?	4
Regulating Cell Function	6
Regulating Keratinocyte Function	7
Regulating Melanocyte Function	7
Regulating Fibroblast Function	8
Features of Ablative and Non-Ablative Treatments	8

CHAPTER 2: Cell Function

Regulating Cell Function to Optimize Skin Health	9
What Nutrients Are Essential for Regulating Cell Function?	9
Keratinocyte Requirements for Optimal Function	9
Product Ingredients Affecting Keratinocytes	10
Antioxidants to Prevent Lipid Peroxidation	10
Melanocyte Requirements for Melanogenesis	11
Product Ingredients Affecting Melanogenesis	12
Fibroblast Requirements for Collagenesis	13
Vitamin C and Collagen Formation	13
Vitamin C and Other Functions	13
Vitamin A and Collagen Formation	14
Key Amino Acids for Collagen Synthesis: Proline and Lysine	15
Copper Peptides for Collagen Synthesis	15
Other Peptides that Target Collagen Synthesis	16
Zinc, a Co-Factor in Collagen Synthesis	16
Zinc Fingers	17
Bioflavonoids for Collagen Synthesis	17
Hormones	18
Iron as a Co-Factor	18
Silicon, Magnesium, Selenium, and Calcium	19
Glucosamine	19
Alpha Linolenic and Linoleic Acid (Omega 3 and 6)	20
Stem Cells	20
Product Ingredients affecting Fibroblasts	21
What Growth Factors Regulate Cell Function?	21
Stem Cells – Navigating the New Frontier	25
The History of Stem Cells	25
What Are Stem Cells?	26
Types of Stem Cells	26
Embryo Stem Cells	26
Fetal Stem Cells	27
Adult Stem Cells (Autologous Sources)	27
Making a Stem Cell Product	27
Going Back to the Beginning – Dedifferentiation	28
Do Plant Stem Cells Fit into the Picture?	29

When is a Plant Stem Cell not a Plant Stem Cell?	31
Back to Humans Stem Cells	31
Bone Marrow Stem Cells	31
Adipose Stem Cells	32
What About Products Claiming to “Stimulate” Our Own Stem Cells?	32
Are “Growth Factor” Products Also from Stem Cells?	33
Bringing It All Together	33

CHAPTER 3: SCARLESS WOUND HEALING (EMBRYO MODEL)

Comparisons - Embryo vs. Adult	35
Distinctive Cellular and Molecular Features of Embryo Wound Healing	35
Differences Between Wound Healing in Embryos and Adults	36
Other Differences and Potential Influences Unique to Embryonic Wound Healing	38
The Adult Wound Healing Process	39
The Phases of Wound Healing	40
Coagulation Phase (If Ablative)	40
Inflammatory Phase (1-3 Days)	40
Lag & Proliferative Phase (3-5 Days)	41
Fibroplastic Phase (5-20 Days)	42
Maturative and Remodelling Phase (28 Days-2 Years)	42
Plausible Explanations for the Differences Between the Embryo and Adult Wound Healing Models	43
Growth Factors	43
The Role of Hyaluronic Acid	45
Why Does Fibrosis Result with IPL, Laser, Fraxel®, Thermage®, Etc?	45
Conclusions and Significance	46

CHAPTER 4: DERMAL NEEDLING

What It Is and What It Can Do	51
Needling Is About Far More Than Collagen Induction	51
Needling Devices/Methods for Collagen Induction	51
Subcision	51
Tattoo Devices	52
Stamps	52
Rollers	52
RF Combined with Microneedling	53
Electronic Devices	54
How to Select a Motorized Needling Device	54
1. PATIENT SAFETY – Cross Contamination	55
2. PERFORMANCE OF THE DEVICE	55
3. QUALITY OF NEEDLE CARTRIDGES	56
4. QUALITY OF NEEDLES	59
Rollers vs. Electronic Devices	61
Studies Done with Rollers Cannot Necessarily be Extrapolated to Pens	61
Advantages of Electronic Devices	62
Advantages of Rollers	62
Myths Propagated by Marketing	63
FDA Reclassification of “Pens” as a Medical Device	64
Cosmetic vs. Medical Needling	66
Differences in Needle Size	67
Cosmetic Needling: How Does It Work?	67
Effects on the Epidermis	68
Effects on the Dermis	68

Dermal-Epidermal Junction – A New Frontier	68
Medical Needling: How Does It Work?	68
Pinpoint Accuracy – Taking Skin Rejuvenation to a New Level?	69
General Observations Opposing Conventional Wisdom	71
Structure of the Dermal-Epidermal Junction	72
Which Cells Are Responsible for Production of Basal Membrane Components?	72
Components of the DEJ and Associated Genes Showing Influence of Microneedling	73
Hemidesmosomes	73
Anchoring Filaments	73
Lamina Densa	74
Why Cosmetic Needling May Improve Wrinkles	74
Summary	76
New Indications/Applications for Microneedling	76
Active Acne	77
Atopic Dermatitis	78
Melanocyte Stem Cell Transplants	78
Melanin Deposits in Hair Follicles to Enhance Laser Hair Removal	78
ALA for Treating Actinic Keratoses	79
ALA for Photodynamic Photorejuvenation	79
Microneedling vs. Microinjection of Tranexamic Acid for Treating Melasma	79
Microneedling with Bleomycin for Treatment of Verruca	79
What Are the Most Effective Uses of Dermal Needling?	80
How Needling Improves Various Skin Disorders & Conditions	80
Lax Skin and Wrinkles	80
What Are Some of the Causes of Lax Skin and Wrinkles?	80
How Does Needling Correct Lax Skin & Wrinkles?	81
UV Damage	81
What Are Some of the Causes for This Failed Repair or Destruction/Removal?	82
How Does Needling Correct UV Damage?	82
Hyperpigmentation	82
What Are Some of the Causes for Hyperpigmentation?	83
How Does Needling Correct Hyperpigmentation?	83
Scars	84
Keloids	84
Hypertrophic	84
What Are Some of the Causes for This?	84
How Does Needling Correct Scars?	85
Stretch Marks	84
Histological Findings	86
What Are Some of the Causes for Stretch Marks?	86
How Does Needling Correct Stretch Marks?	86
Rosacea	87
What Are Some of the Aggravating Factors of This Condition?	87
How Does Needling Correct Rosacea?	88
Hair Loss	88
Androgenetic Alopecia	89
Alopecia Areata	89
What Are Some of the Causes for Hair Loss?	89
How Does Needling Correct Hair Loss?	89
Synergistic Products for Hair Restoration in Conjunction with Needling	90

CHAPTER 5: TREATMENT PARAMETERS AND PROTOCOLS FOR NEEDLING

Patient History and Exam	91
Consultation and Treatment Records	91
Contra-Indications/Special Precautions	92
Atopy, Asthma, Hay Fever and Allergies	93
Rosacea	93
Anticoagulated Patients	93
Drugs and Supplements Associated with Photosensitivity	93
Considerations with Fitzpatrick III and Above	94
Ingredients to Avoid with Dermal Needling	94
Preservatives	95
Parabens	96
Citrus-Derived Preservatives	96
Formaldehyde-Releasing Preservatives	97
Other Preservatives	98
Fragrance	99
High Risk with Needling	99
Surfactants	101
Emulsifiers	101
Humectants	102
Emollients	104
Acids	105
Alpha Hydroxy Acids or AHAs	105
Beta Hydroxy Acids or BHAs	105
Other Acids	106
Dyes and Colouring Agents	106
UV Filters	107
The Collagenase Story (Another Precaution)	107
Avoiding the Inflammatory Response	108
Back to Basics - Normal Maintenance and Repair in Unwounded Skin	108
What Makes a Fibroblast Tick?	110
Back to Basics – Collagen	110
Back to Basics – Elastin	112
Back to Basics – Repair in Wounded Skin	112
Which Wound Healing Phases Are Necessary in Non-Ablative Rejuvenation Treatments?	113
Fibroblasts – Good or Bad?	114
Myofibroblasts – The Bad Guys	114
What Are the Four Possibilities of Response to Injury?	115
A Brief Review of Collagen During Acute Wound Healing	115
A Brief Review of Elastin During Acute Wound Healing	116
Why the Fuss? Things Look Great!	116
Back to Basics – Keratinocyte-Fibroblast Interaction	117
Combating Inflammation as Part of the Inevitable Rejuvenation Process	118
Platelet Rich Plasma	121
Safety with Neuromodulators and Fillers	121
IPL, Laser, Fraxel®, Etc.	121
Risk of Secondary Infection with Cosmetic Needling	122
Pregnancy	122
Keloid	122
Immune-Suppressed Patients	122
Diabetes	122
Parabens	122

Skin Preparation – Home (Cosmetic Needling)	123
Home Care Products	123
Cosmetic Needling (Rolling) at Home	123
Cosmetic Roller Instructions	123
Step 1: Cleansing	123
Step 2: Roller	124
Step 3: Active Ingredients Application	125
Step 4: Protection	125
Step 5: Roller Maintenance at Home	125
Skin Preparation – Clinic (Medical Needling)	126
Topical Anaesthesia vs. Dental Blocks	126
What Size Needle?	127
Clinical Techniques	128
Medical Needling Protocol	128
Preparation	128
Best Practice Needling Technique and Procedures Using a Roller	129
Best Practice Needling Technique and Procedures Using a Pen	130
1. Technique for Even Endpoint (Erythema)	130
2. Below the Eyes	130
3. Perioral Lip Lines	131
4. Nasolabial and Mental Folds	131
5. Nose	131
6. Forehead	132
7. Upper Lids	132
8. Wrinkles in Front of Ears	132
9. Neck	132
10. Scars	132
End Point with Microneedling Treatments	133
Number of Passes	133
Visible Endpoint	133
Adjuncts: Platelet Therapy	134
How to Clean the Medical Needling Device	134
Post Treatment Considerations	135
Immediate Post Treatment Care	135
Home Care Considerations	135
Predicted Appearance After Medical Needling	136
Post Treatment Plan Guideline	137
New Post-Microneedling Protocols	137
Immediately after Microneedling – Collagen Induction and Scars	138
Inflammatory Phase 1-5 Days	138
Fibroplastic Phase 5-14 Days	139
Maturative Phase 14-28 Days to 2 Years	139
Immediately after Microneedling – Hyperpigmentation	140
Bringing It All Together to Avoid Failure in Microneedling Treatments	140
1. PATIENT SELECTION – Picking the Fights you can Win	141
Is This the Appropriate Patient to Treat?	141
Exam and Diagnosis (Depth of Pathology)	146
Diagnostic Equipment	147
Magnifying Lamp	147
Wood's Light	147
Photographic Equipment	148
2. Appropriate Product (Ingredient) Selection	150
3. Appropriate Pen Selection	150

4. Appropriate Penetration Depth – Needle Length	151
5. Appropriate Period Between Treatments (Frequency)	152
Required Number of Treatments	153
Scope of Practice	153
Am I qualified to treat this condition?	153
Will this condition respond to needling?	155
Paraben Story Update	156
Signalling Molecules	156
Cell Receptors	156
“Imposters” – Endocrine Disruptors	156
Signalling Molecules – Hormones	157
Breast Cell Receptors	158
Breast Cell Receptors – Hormonal	158
Breast Cell Receptors – Non-Hormonal	159
Receptors and Breast Cancer	161
HER2 Overexpression in Breast Cancer	162
Simplified Clinical Relevance of Receptors and Breast Cancer	162
Why Have Many Studies Failed to Prove Paraben Links to Breast Cancer?	162
Myth – Estrogenic Effect Associated with Parabens is Based on Estrogen Mimicry	163
If Not Direct Stimulation of ERs by Parabens, Perhaps Via HER2 Pathway??? – No!	163
Inching Closer to the Truth – Study Looks at “Parabens and Human Epidermal Growth	
Factor Receptor Ligand Cross-Talk in Breast Cancer Cells”	164
Findings	164
Conclusion	164
Bringing It All Together	164
Receptors	164
Heregulin (HRG)	165
Parabens	166
Summary	166
Conclusion	167
Where Do We Go from Here?	167
HA – No Laughing Matter	168
Hyaluronic Acid – Beyond Wrinkles, Moisturising, and Plumping	169
How is Hyaluronic Acid Made?	170
How is Hyaluronic Acid Fragmented?	170
Causes of HA Fragmentation	171
Biofeedback to Facilitate Homeostasis – HA Fragmentation	171
Biofeedback to Facilitate Wound Healing – HA Fragmentation	172
What Are Some of the Functions of Hyaluronic Acid?	173
Are the Antioxidant Properties of LMW-HA Superior to HMW-HA?	174
Hyaluronic Acid Directing “Life and Death” via Hyaluronic Receptors	174
Marketing Spin vs. Evidence-Based Science – Why the Disconnect?	175
The Biological Function of HA Molecules Based on Size Differs Drastically	176
Pathologies Associated with LMW-HA	176
But We Are Only Applying HA to the Epidermis. Surely There Are No Systemic Effects?	176
Does Dermal Infusion Occur When Products Are Applied Topically?	177
Are There Biological Effects at an Epidermal Level That Induce Dermal	
Effects or Systemic Effects?	177
What About Contradictory Studies?	178
Surely Products Approved by Health Agencies Meet Safety Specifications?	179
But the Results Are Great!	180
If Injury Creates LMW-HA, Why is it Safe to Microneedle?	181

The Platelet-Rich Plasma Story	182
What is PRP?	182
The Upside of PRP	182
PRP and the FDA	183
How Does PRP Work?	183
How is PRP Prepared and Does It Really Matter?	183
History of PRP	184
PRP Uses	184
PRP Use in Veterinary Medicine	184
PRP Use in Orthopedics and Sport Medicine	186
PRP Use in Dental Surgery	189
PRP Use in Dermatology – General	189
PRP Use in Dermatology – Alopecia	190
General Discussion	191
1. Impossible to standardize – Too many variables	191
2. Disrupting the balance (Homeostasis) of nature – Agonists and Antagonists	192
3. “Shotgun Therapy” vs. “Cruise Missiles”	193
4. Flawed evidence – When is a “study” not a study?	193
The Downside of PRP	194
PRP Studies – Past and Future	195
PRP – Fact or Fiction?	197
PRP – What Does the Future Hold?	198

CHAPTER 6: CASE STUDIES

Expectations and Outcomes	199
Wrinkles	199
UV Damage	199
Lax Skin	200
Actinic Keratosis	200
Hyperpigmentation	201
Rosacea	201
Scars	201
Stretch Marks	202
Hair Loss	203
Adverse Reactions	204
Review of Complications with Microneedling	204
Cross Contamination	204
Allergic Reactions	205
Post-Inflammatory Hyperpigmentation	207
Scarring	209
Granulomas	210
Glycation	212
Nerve Injuries	212
Photocontact Dermatitis	213
Case Study (In the Patient’s Own Words)	213

CHAPTER 7: OVERVIEW OF SYNERGISTIC TREATMENT MODALITIES

The How’s, When’s & Why’s of Combination Therapy	215
The Concept of Corneotherapy – Back to the Future	215
Treatment Outline	216

Non-Ablative Treatments	216
Light-Emitting Diode (LED)	216
Sonophoresis/Iontophoresis	218
Microcurrent	218
Lymph Drainage	219
Intense Pulsed Light (IPL)	220
Mid-Infrared Lasers	220
Nd:YAG	220
Fraxel®	220
Ablative Treatments	221
Chemical Peels	221
Alpha Hydroxy Acids (AHA)	221
Glycolic	221
Lactic Acid	222
Mandelic Acid (Alpha-Hydroxybenzeneacetic Acid)	222
Beta Hydroxy Acids (BHA)	222
Salicylic Acid	222
Beta-Lipohydroxy Acid (C8-Lipohydroxy Acid) (LHA)	223
Other Acids	223
Trichloroacetic Acid (TCA)	223
Enzymes	223
Bromelain or Papaine	223
Desquamation Due to Epidermal Cell Turnover vs. Exfoliation Due to Ablation	223
Ablative Treatments (Continued)	225
Microdermabrasion (MDA)	225
Laser Resurfacing (Ablative)	225
Pulsed Dye Laser	226
Infrared Lasers	226
Other Modalities	226
Hyperbaric Oxygen Therapy	226
Radio Frequency (RF)	226
Summary of Appropriate Combination Therapy	227

CHAPTER 8: ADVANTAGES & DISADVANTAGES OF NEEDLING

Why Consider Microneedling in Your Practice?	228
Advantages	228
Disadvantages	228
Conclusion	229
The Role of Keratinocytes in Collagen Induction	231
Frequently Asked Questions	232
Q&A: Interesting Question and Answer	247
Author's Response	247
Patient's Response	249

Abbreviations	250
